

UNIVERSITY OF DUBROVNIK
UNIVERSITAS STUDIORUM RAGUSINA

DUBROVNIK

Historic city, traces its roots to the ancient world ...

*Seafaring and trade, wise international policy and
skilful diplomacy brought centuries of economic and
cultural prosperity...*

A wide, stone staircase leading up a hill in Dubrovnik, Croatia. The stairs are made of dark stone and are flanked by stone walls. In the distance, a large, ornate building with a dome is visible at the top of the stairs. Several people are walking on the stairs, and a street lamp is visible on the right side.

Historical academic tradition:

*In 1624 Jesuits founded “Collegium Ragusinum”,
a public institution of high learning where art and
natural sciences were studied.*

Modern academic tradition:

*Forty years of high education of seafarers at the
Maritime Faculty of Dubrovnik...*

*Thirty years of economy and business education at
the Faculty for tourism and foreign trade...*

The background image shows the main entrance of the University of Dubrovnik. The building is a light-colored, multi-story structure with a prominent balcony above the entrance. The name 'UNIVERSITET U DUBROVNIKU' is inscribed on the facade above the entrance. A wide set of stone steps leads up to the entrance, where many students are walking. The scene is captured in a slightly blurred, candid style.

UNIVERSITET U DUBROVNIKU

UNIVERSITY OF DUBROVNIK

Established in 2003, 2600 students, 160 teaching and administrative staff. Organisation system grants complete integration of the University.
